-Hopefully some enjoyable hours of flying and exploring

San Juan Islands is a paradise for all pilots.

One of the many islands of the archipelago.

San Juan Islands

San Juan Islands is the perfect place for you to visit on your next flight trip. Situated between the Haro and Rosario Straits between Vancouver Island and the United States Mainland, with Vancouver to the north and Seattle to the south, the San Juan Islands offer a unique mixture of flora & fauna - nature & culture.

With its over 150 islands and reefs San Juan Islands is an ideal area to explore the breath-taking nature, the deep-rooted culture and the maritime cuisine - the surroundings offer plenty of adventures and experiences to fill weeklong stays. On clear days you can even see majestic Mt. Baker to the east.

Fly into small tucked away airstrips or take your float plane to one of the thousand reefs or bays. Experience the full range of what nature has to offer. From a coastal environment comprising 480 miles of shoreline to mountain flying around peaks up to 2500 feet - San Juan Islands can offer it all!

"Say farewell to worry and stress and say hello to the mellow islands vibe, a temperate year-round climate, and long, lazy hours of doing just what you want. So, relax—you're on "island time" now!"

- San Juan Islands Visitors Bureau

SOMETHING TO DO

Tasks:

- Rumours go that a shoal of orcas has been spotted in the area. Go and locate them. Take a photo or report their location otherwise.
- Take a souvenir photo of your aircraft at every airfield you land at.
- How many lighthouses can you find? Make a count of the lighthouses and report their location.
- The annual show of the great "Flying Goose Circus" starts in a week. Due to local environmental concerns, the circus had to change its location. However, communication has been unreliable and slow. With only a week until the start of the show, a growing number of people is concerned to miss the show. Find the circus' whereabouts and report back (Optional).

San Juan Island Airstrip.

Eliza Island Airstrip.

Cypress Island Airstrip – Always on Top!

Shaw Island Airstrip.

OP-ED:

Installation

- Download the airport archives.
- Unpack the airport archives.
- Move the airport folders into your custom scenery folder.
- Make sure the airports are sitting above any other airports, overlay, ortho-scenery etc. in your customscenery.ini file.
- Enjoy!

Optional:

- Download the 2 ortho-tiles.
- Unpack those.
- Move the folders into your custom scenery folder.
- Make sure the tiles sit below any airports and overlays but above any interfering ortho-scenery.
- Enjoy!
